Part A - Reading a short text

It is very difficult for koalas to stay awake because they need 18-22 hours of sleep a day! But sloths are not far off in the competition. They sleep close to 20 hours a day. Hang around the treetops with these cute animals to find out why they love sleeping so much!

Dolphins sleep with one eye open because only half of their brain sleeps at a time. And did you know that it is impossible for giraffes to sleep for more than 30 minutes? Keep your eyes open for more fascinating facts behind these animals' sleeplessness.

Social media is a useful tool to communicate with people, but social media addiction can be a serious problem that tears relationships apart.

Develop new hobbies as boredom makes social media addiction even worse. Interesting and fulfilling activities such as playing an instrument, reading a book or learning a new language, can help people stay away from their smartphones.

Instead of taking photos of food and sharing them online, eat the food slowly and share it with your close friends and family.

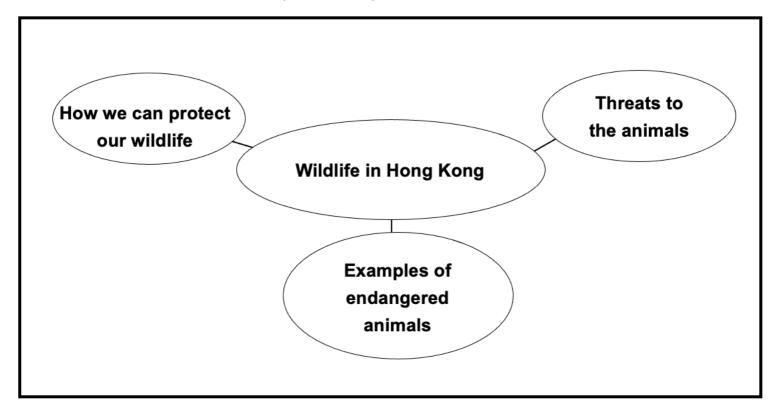

My wife Cinderella spends hours taking selfies and sharing them on social media websites every day. When we go out to eat, she takes photos of every dish we eat, edits them with filters and posts them on social media websites. Then she spends the entire meal checking the number of likes on her phone instead of talking to me. I feel bored and lonely, but I don't know what to do.

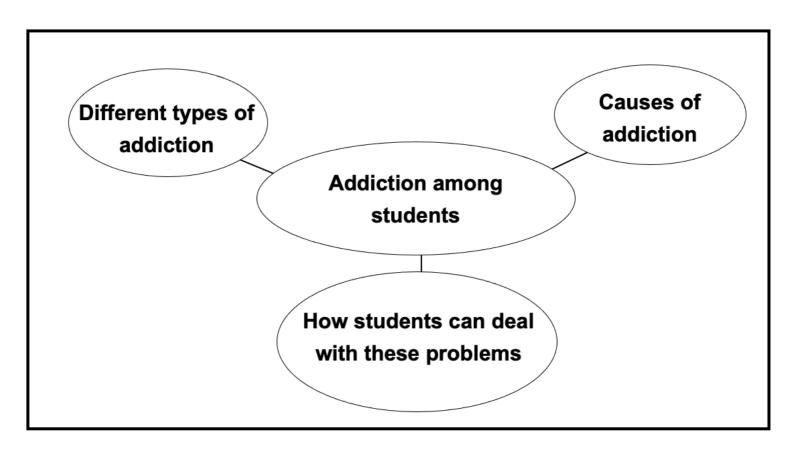

Next month, we're going to a party at our friends' castle. The party lasts for six hours. I hope she can talk to me and our friends instead of playing on her phone all the time.

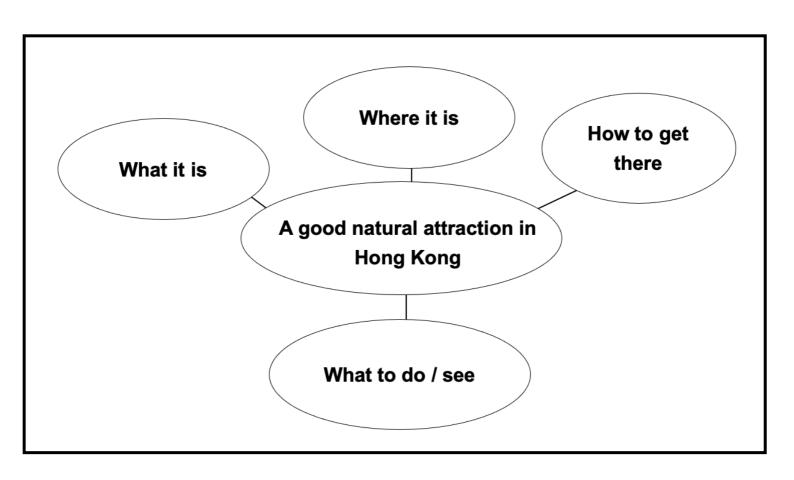

First, we went 'glamping' in Tin Shui Wai. It was an incredible experience. I had never seen anything like that! Next, we visited the Hong Kong UNESCO Global Geopark and explored those amazing rock formations. The Hong Kong Science Museum was the best, though. The exhibits are fun to see and play with and I got to learn a lot about science and technology.

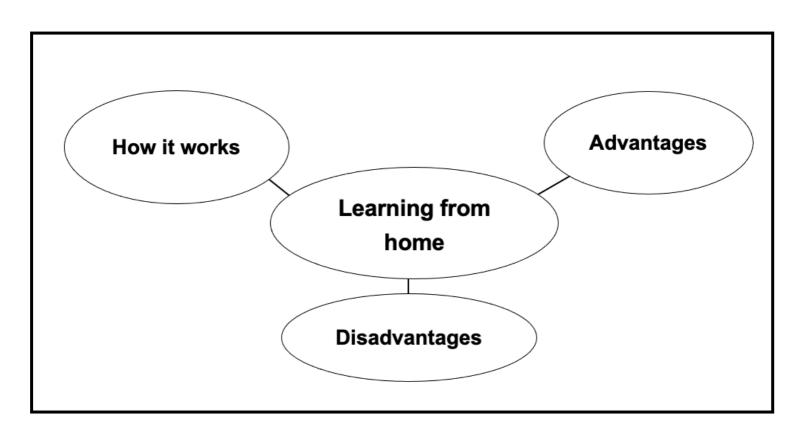

Hong Kong has such a good public transport system. The Octopus card is very useful. It makes it easy to get on different types of transport.
